HEAVY DUTY PLATEN DIE PUNCHING MACHINE

We are proud to present Heavy Duty Platen Die Punching Machine as part of our product range.

The heavy duty Platen Punching Creasing & Embossing press is manufactured for creasing and punching of cardboard cartons as well as corrugated boxes. This robust machine is easy to handle, sturdy in construction and can withstand heavy strains in continuous operation.

With the steel rule dies made to cut & crease & give a shape to sheet of paper, duplex board or corrugated sheet, Die Cutting Machine is used to make any type of packaging boxes. The main purpose of the Die Cutting Machine is to cut, emboss & texturize the materials such as duplex paper, thin metal (soft), poster board, corrugated sheets. The tedious task of cutting letters, numbers & shapes again & again with perfect shape and accuracy is done by Die Cutting machine.

Features:
- Quick & simple adjustment of impression / pressure equalization independent for each side.
- Rigid construction and compact design of the machine requires minimum floor-space.
- Number of impressions made by the machine are displayed on the operating penal.
- Main Shaft & Connecting Arms are mounted on Phosphor Bronze Bushes.
- One piece casting, properly stress relieved.
- All the shafts are of high quality alloy-steel.
- High performance Precision Gears.
- Single piece connecting arms of steel.
- Moving Platen running on hardened steel rails
